5s, photographed; the paper is stiffer than the genuine, and not so good, and the bill is 1-16th of an inch longer. They have a blurred appearance, while the signatures show through more plainly than on the good note.

10s raised from **1s**; portrait of Chase on upper left corner.

Counterfeit Postage Currency.—The 25 cents are poorly engraved and on poor paper, and are easily detected. The 50 cents are of a bluish shade of green, while the genuine are of a bright deep green. The heads of Washington on the counterfeits are not alike. The right hand one looks fierce and determined; the left hand heads look sleepy and imbecile.

NEW YORK, Wednesday, July 22, 1863.

The Weekly Statement of Averages of the Banks of the City of New York for the week ending June 18th, presents the following changes from the previous week:

Decrease in Loans	$1,896,381
Decrease in Specie	311,968
Decrease in Circulation	41,377
Increase in Undrawn Deposits	2,343,773

Compared with the corresponding week of last year, the statement is as follows:

	July 19, 1862.	July 18, 1863.
Loans	$148,827,423	$173,120,387
Specie	31,926,009	38,254,427
Circulation	9,155,301	5,880,623
Gross Deposits	156,330,409	205,181,005

The Bank return shows a further accumulation on the Deposit line; the increase for the fortnight being about five millions. The Loans and Discounts fall off nearly two millions on the present return. The stock of Specie remains above $38,000,000, the variations being but slight since the 1st of July.

Money matters appear to be working very easy. Borrowers with good collaterals have no difficulty in supplying their wants at 6@7 per cent, and we hear of some transactions as low as 5. This increasing ease is in the face of an average reduction of loans by the banks by about two millions of dollars, showing that private capital is becoming more abundant on the street.

Gold has been somewhat excited during the last few days, and after selling at 123¼ suddenly rose to 130. From this price it soon receded, closing at 125¼.

Sterling Exchange has been exceedingly variable on account of the fluctuations in gold, closing at 137.

The following are the latest quotations for Domestic Exchanges:

The Stock market is firm for Government stocks and Treasury paper, but railroad stocks are rather irregular. Indebtedness Certificates are firm.

The deposits at the Sub-Treasury for conversion into 5.20's are on the increase. At the present high rate of nearly all other securities these are the most profitable as well as the safest investments in the market.

The aggregates of the Philadelphia Banks at the last weekly statement, shows the following changes, as compared with last week:

Decrease of Loans	$20 3,876
Increase of Specie	1,199
Increase of Deposits	229,795
Decrease in Circulation	24,743
Increase of United States Notes,	89,842

NEW POSTAGE CURRENCY.—The new fractional currency, which is to replace the present Postage Currency, is nearly ready for circulation. It is said they are far superior in design and execution to that which we now have.

☞ Gold was 41½ per cent premium in London, from November, 1812, to March 1813, five months. The suspension of specie payments lasted from 1793 to 1818, twenty-five years. In 1815, the British Government borrowed thirty-six million pounds sterling in gold, and agreed to return one hundred and eighty four for every one hundred pounds borrowed, besides paying 2 per cent interest.

☞ The LAKE BANK, Skaneateles, N. Y., has lately been organized under the State law with a capital of $100,000. ASSON LATHAM, President, CHARLES PARTER, Vice President, HENRY J. HUBBARD, Cashier.

☞ The MARINE BANK has declared a dividend of 5 per cent free of Government tax, payable on the first of August.

A Symptom of Prosperity.

The returns of our State Savings Banks gives one of the most reliable indications of the prosperity of the operative classes of population. This year, the result shown by the official returns is widely different from what have been anticipated from a variety of circumstances arising from the derangements caused by the war. The depreciation of gold has created a general advance in rents, and in the price of all the staple articles of consumption, and as a rule wages have not advanced in an equal ratio. For this reason, it might have been expected that the savings of the masses would fall short of other times, when wages were higher in proportion to the cost of living. On the other hand there are reasons for anticipating that the withdrawals from our savings institutions would be unusually large. We have large masses of people who are dependent on the earnings of our volunteers, which are never paid to the full amount due, and are in the majority of instances less than what the soldiers had been accustomed even before they enlisted. This might be expected to produce considerable withdrawals from the accumulation of such families in the savings banks.

In spite, however of these and similar considerations, we find that the deposits in the savings banks of the city of New York have enormously increased during 1862. On January, 1st 1862, the amount due depositors in all the savings banks of the State was $64,083,150; on the first of January, 1863, the amount had increased to the surprising figure of $81,642,610—showing a progress in one year of twenty six per cent or in round numbers of seventeen and a half millions of dollars.

The largest ratio of increase in the deposits has been in the institutions outside New York.

DEPOSITS LYING IN SAVINGS INSTITUTIONS IN NEW YORK CITY.

In January 1863	$50,192,000
In January 1862	44,194,000

From this it appears that the deposits in the New York City Institutions increased during 1863 about six millions or at the rate of sixteen per cent. The deposits in the savings institutions outside New York City at the same period were:

In January 1863	$31,400,000
In January 1862	19,800 000
Increase	$11,600,000

These figures show an immensely larger ratio of increase in the deposits of the country banks than the Metropolitan. The city institutions show an increase of six millions in forty-four, the country an increase of over eleven and a half millions on twenty millions—in other words the increase in the city is only sixteen per cent, while in other parts of the State it is sixty per cent.

The plain inference from this remarkable fact is that class of persons who support these institutions are much more prosperous in the rural districts than in the metropolis. It is not at once apparent how there should be such a preponderance of savings in favor of the rural sections of the State. There is, however, in those districts a class of depositors who are not found in New York City. Small farmers and master mechanics are accustomed to deposit their surplus income in the savings bank, and these have undoubtedly had a rich harvest of profits during the war. They have mostly grown all the produce they consume, and have had to pay no advance on anything except the small amount of manufactures they purchase. The operative class in New York on the other hand, have had to pay in advance not only their consumption of manufactures but of every sort of produce. This class of rural depositors have also realized an extra price on the products of the field and the workshop, adding materially to their yearly savings. The withdrawal from the banks in the interior districts for the support of volunteer families has probably been in much lower ratio than in the city, owing to the better financial condition of the soldiers families in the towns and villages of the State. What ever may be the value of these suggestions, the inference is plain from the facts above stated that the rural population is in a highly prosperous condition during the period of the war, and that the operative classes of the metropolis are experiencing none of the sufferings that they were told would fall upon them as the result of the war.—*N. Y. Economist.*

METROPOLITAN BANK NOTE REPORTER.

MR. JAMES B. BURGESS, No. 680 BROADWAY, under the East River Bank, and

Are authorized agents to receive subscriptions for this Reporter. All complaints sent to their offices will receive prompt attention. We have made this arrangement for the convenience of our up town subscribers.

THE NEW NATIONAL LOAN.

U. S. 6 PER CENT BONDS

FOR SALE AT PAR.

The interest on these bonds is at the rate of six per cent. per annum, and is payable 1st of May and November, in GOLD. They are called "FIVE TWENTIES," because redeemable at the option of the Government after five or within twenty years.

The Coupon Bonds are issued in denominations of $50, $100, $500 and $1,000, and the Registered Bonds in denominations of $50, $100, $500, $1,000, $5,000 and $10,000.

To facilitate investment in them, and make them more accessible to the public, we have made arrangements to keep on hand a constant supply of all denominations for sale, at the same rate at which they are issued by the Government, viz: PAR: *Interest to commence from the date of purchase.*

We are thus enabled to save parties all trouble and delay in funding Legal Tender Notes, or otherwise investing in these bonds.

Orders or enquiries by mail will receive prompt attention, and the bonds will be sent to any address by mail or express as desired. Payment may be made in Current Bank Notes, Drafts on City Banks, or U. S. Legal Tender Notes.

These bonds are the *cheapest Government Securities now in the market*, and pay the *largest interest* on their cost.

They are destined to become the BEST KNOWN, MOST POPULAR, and MOST AVAILABLE, of all bonds of the Government.

The operation of the National Tax Law, which it is now certain will produce double the income originally anticipated, will make the issues of the United States Government the safest and most desirable investment in the world. They are in reality a first mortgage on everything in the country, as no railroad or corporation of any kind, can pay a dividend, or the interest on its own issues, until it has contributed out of its gross income, through the operation of the Tax Law, to the support of the National credit.

These are the bonds upon which the Government now relies, *through the confidence and patriotism of the people*, for continued financial support.

We keep them for sale to encourage investment in them, to give the public convenient access to them, and to aid the Government, by promoting their rapid absorption; and the money invested in them through us, contributes to the direct and immediate support of the National Treasury.

Banks, Bankers and Brokers, receiving orders for the funding of Legal Tender Notes, or the purchase of these bonds, can obtain them at our counter without trouble or delay.
